### Tuttle and Bailey Cold Air Faces and Registers

### Style C. Cobble Cold Air Face

Made only in the Standard Sizes shown below.

Design permits the largest free air opening consistent with rength, safety and appearance.

Of cast iron, it has the desirable depth to the cross barrings obviously missing in stamped steel faces.

Rolled edge and parrow tim (approx 14, inch) assure a sping strength,

Rolled edge and narrow rim (approx. 1/2 inch) assure a snug,

even, easy setting without recessing.

Finish—Tanbo Antique—harmonizes well with all color schemes. Tanbo Oak finish to order.

Wear comes only on "Tips" of cobbles—the finish lasts

indefinitely. As face is not attached in any way, it is easily removed to

allow cleaning of the cold air box.

The Coldia Register Style 80 matches this Cold Air

The Cobb	le Register	Style 80 matc.	nes this Col	d Air Face.

### Floor Registers and Faces "T & B"

Style 70—Tuttle & Bailey—All Steel Registers
Plain Lattice Design—Multi-Valve
Made of wrought-steel throughout. Exceptionally sturdy, although comparatively light in weight, thus reducing cost of fraight or express observed.

although comparatively light in weight, thus reducing the freight or express charges.

For floor use the Face is rigidly braced with strengthening bars and the edges of the Face are offset to make a close fit against the floor or wall.

This all wrought-steel Register is especially suitable as a Pulley Register where light weight is required for use in the ceiling or wall. Details regarding adaptability of Style 70 Registers for this purpose will be furnished on request.

### "H & C" No. 150 Series Baseboard Registers

See Catalog No. 29, Section H.

This is a two-piece register with face that is removable by a quarter turn of the locking buttons.

While this design register has not quite the free air capacity of the bar-type No. 170 and No. 190, still the oblong hole perforations make it more efficient than other plain lattice design registers. Height from floor to face opening, 2½ inches.

No. 150, Two-Piece. Net Prices Each.

### "H & C" No. 160 Series Baseboard Registers

This register follows the general detail construction of No. 150 series, except that it is a one-piece register. The frame and face are made from one piece of wrought steel and the face is not detachable. The fretwork is formed hack, affording large free air capacity. The single valve is controlled by an adjustable friction hinge which is positive in operation and thoroughly dependable.

Height from floor to face opening, 2¼ inches.

No. 160, One-Piece.

Unless otherwise specified, Milcor Titclock Stove Pipe is always shipped K. D. Nested. 25 Lengths (each Length full 24 inches long), packed in Fiber Cartons.

Uniform deep blue in color. Full weight and full size.
The Milcor Titclock is simple but very effective. It positively prevents collapse of pipe. The Titclock runs the full length of the pipe-seam and can be cut at any point without requiring rivets to secure a continuously tight seam.

### MILCOR Stove Pipe Elbows

Milcor Stove Pipe Elbows are riveted top and bottom. Modern equipment insures uniformity of workmanship.

### Wilder Metal Pipe and Elbows

Aluminum coated Pipe and Elbows that defy rust. Stands up under wear and weather that would ruin any ordinary metal. It keeps its smooth, hard surface year after year through conditions that would rust out iron or steel in months. It withstands the destructive action of gases and acids. Used extensively on gas stoves, water heaters, boilers, coal stoves and furnaces. Following sizes carried in stock:

### "KANT-LEAK"

### Non-Syphoning 11/4" Corrugated Roofing

This famous roofing has given excellent satisfaction for years. The patented non-syphoning feature, which is clearly illustrated in the accompanying cuts, positively prevents leakage.

The Non-Syphoning feature of Kant-Leak Corrugated Roofing is proven effective by the above Demonstration Box.

We will be pleased to furnish the above Demonstrating Box to any dealers who may be interested.

The box is composed of two small sections of Non-Syphoning Roofing, placed together the same as they would be on a roof. The sides of the box are soldered fast to the outside edges of the roofing. The corrugated lap is identically the same as it would be when applied to the roof.

This box can be filled with water, and there will be no syphoning whatever, as our air space will entirely offset the capillary attraction. Any scepage that may occur from a driving rain, or from the corrugations being banked with snow, is earried away by the small gutter, which forms the Non-Syphoning feature. The capacity of said gutter is much greater than is necessary to carry all the water that may be driven over or through the corrugation.

You can guarantee this roofing to your customer without any hesitancy whatever. We give exclusive territory and protection to one dealer in each vicinity who is willing to stock this roofing. All those who have used it are satisfied customers, and every one a booster.

### SPECIFICATIONS

Size of corrugations 11/4".

26" wide, covers 24".

Stock lengths 5, 6, 7, 8, 9, and 10'.

Special lengths 11 and 12'.

Made of Open Hearth Galvanized Steel in 29, 28 and 26 ga. Also of Toncan Iron in 28 and 26 gauge.

### Corrugated Elevator Siding

11/4, 2 and 21/2" Corrugations.

Sheets are laid in such a manner that the elevator sides have a chance to settle without disturbing the fastenings of sheets. Our 1½, 2 and 2½" Corrugated Sheets are 26 inches wide by 32 inches long, and cover 24 inches. The sheets are laid with a 2-inch end lap and the nails are two inches above the upper edge of lower sheets, thus allowing the sheets to slip 2 inches in every 32 inches as the sides of the elevator settle, and will not buckle or draw the nails.

### Lead Washers and Lead-Headed Nails

F. O. B. CANTON, OHIO. All Eller Roofing also made from TONCAN IRON. Write for Prices,

The affiliation of The Eller Manufacturing Company with Milwaukee Corrugating Company, Milwaukee, Wisconsin, is of tremendous importance to both the Sheet Metal Trade and Building Supply Dealers in Eastern and Southern States.

and Southern States.

This affiliation makes possible in these territories the same efficient and speedy service for which the Milcor organization has earned so fine a reputation throughout the Middle West and for which the Eller organization is well-known in the East and South.

Complete stocks of sheets are carried in Canton, Milcohard Chicago, Milcoh

waukee and Chicagao. Same-day slipments of Sheets from any of these points is regular routine. The same service is given on Roofing Ternes, Coke Tin and all styles of Metal Roofings.

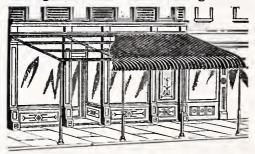

The best of equipment for the manufacture of Sheet Metal Products is a guarantee of speedy delivery of fabricated merchandise. And two organizations trained to the service required by the Sheet Metal and Building Materials Trades seals a promise of careful, painstaking, speedy service at all times.

Milcor supplements the old efficient Eller Service to the trade. Expect from the affiliated organizations the

service your business requires.

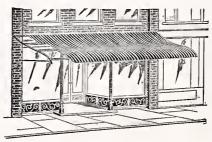

Always State Gauge Wanted, and Whether Painted or Galvanized.

## All-Steel Weatherboard Siding Garages

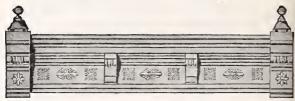

Angle-irons, gusset plates, metal "weatherboard siding," doors and gable-ends-those are the only units needed and they are all standard and interchangeable

whether a two-car or twenty-car garage is wanted.
All units are interchangeable. A two-car garage, three-car, four-car, or any size desired takes the same units, multiplied according to the need.

Write for Special Offer with Sales Plan and Prices.

## Our New "TORPEDO" Ventilating Skylight

#### GALVANIZED.

Fireproof, Automatic and Non-Fire Draft.

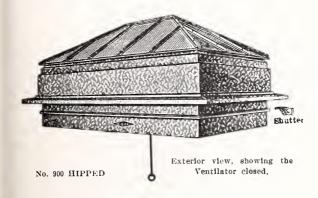

All Milcor Skylights are shipped with Ribbed Giass cut to size and boxed separately, unless otherwise specified when ordering.

#### THE ACME OF PERFECTION.

To meet the requirements of Architects and Builders for a Perfect Ventilating Skylight, the "TORPEDO" offers a combination in construction which is unequaled. It combines with the ordinary types of skylight tops a Ventilator provided with a movable shutter for opening, closing or otherwise regulating, to the amount of ventilation desired. The ventilating opening is protected with coarse mesh wire screening, to prevent the entering of sparrows, swallows, or other birds.

Wire cables are fastened at the upper four corners of a movable shutter and operate over single pulleys at the corners and over a twin pulley in the middle cross bar. The movable shutter operates between the inner side of upper casing and the outer side of wire screen and is raised to open by pulling the chain and held in place by fastening inside; it is lowered to close by releasing the chain.

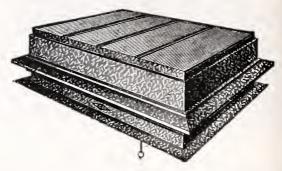

## "TORPEDO" Ventilating Skylight

All Milcor Skylights are shipped with Ribbed Glass cut to size and boxed separately, unless otherwise specified when ordering.

Galvanized. Can be used on any style roof.

Made in three styles of skylight tops-hipped, single and double pitch.

Simple in Construction-Easily Operated.

No. 901 SINGLE PITCH.

The above Cornices are suitable for use with all Celling Plates shown.

## WRITE FOR NEW METAL CEILING CATALOG Adjustable

## Self-Furring Ceiling Plate No. 1200

For Factories, Warerooms, Storerooms, Garages and other places where economy is one of the principal considerations.

The pattern of the individual plate is so designed as to admit of the adjustment of the plates, two inches lengthwise, longer or shorter, in erecting, to conform to the variation in space between the joists.

Ceiling Plate No. 1200-Size 24x98 inches.

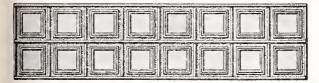

No. 1200 plate, reckoning its covering capacity at 96 inches, readily adapts itself to joists laid 12, 16 or 24 inches on center.

The large beads running full length of the plate between each row of panels give it rigidity and strength, and obviate the necessity of furring strips. The plates are nailed along each side, and the ease and simplicity of erecting will be quickly appreciated.

Net Price, per square, primed one coat......\$3.50

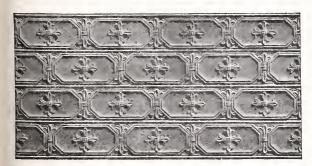

## New Continuous Ceiling Plate No. 1201

With 12 inch Panel.

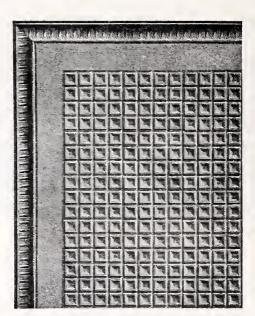

Net Price, per square, primed one coat......\$3.50

## Continuous Ceiling Plate No. 403

Size 24x96 inches only.

Net Price, per square, primed one coat......\$3.50

## ELLER'S NEW CREATION

## SPANISH TEXTURE CEILING and WALLS in METAL

This newest design brings Metal Ceilings and Walls right up to date, and provides a special advantage in selling to contractors and owners for new store, hall, theater and other public building installations.

On remodeling jobs, this new Spanish Texture finish for walls and ceilings affords a means of securing modern interiors at a very moderate cost, especially considering its freedom from cracks and its being firesafe.

This ceiling and wall design takes a very interesting two tone finish with a splattering of color in true Spanish style. Remembering that rough wall and ceiling textures are especially popular, Sheet Metal Contractors should take advantage of the opportunity to sell this new design for both new and remodeling jobs.
